Toujeo®
insulin glargin 300E/ml

Buugyarahen waxaa loo qoray kuwiina qaba sonkorta oo uu dhaqtarkoodu u soo qoray Toujeo (insulin glargine 300 units/ml). Ula jeedka ugu wayn ee dhammaan daaweynta sonkorta waa in lagu guulaysto in la helo habka suurtagal ahaan ugu caadiga ah ee heerka sonkorta dhiigga lana dareemo caafimaad isla waqtigaas.

Haddii aad qabto wax su'aalo ah oo ku saabsan daaweynta sonkortaada, waa inaadan ka caga jiidin inaad su'aasho dhaqtarkaaga ama kalkaaliyahaaga.

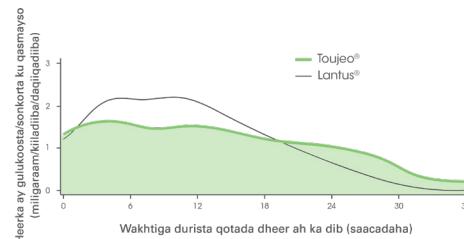

Maxay tahay sababta aan ugu baahanahay insuliinta aan hore dhiigga u galin?

Insuliintu waa hoormoon ka caawisa jirka inuu maamulo heerka sonkorta ee dhiigga kujirta. Insuliinta aan hore dhiigga u galin waxay ka caawinaysaa jirka in uu sii wado heer joogto ah oo insulin ah 24 saac maalintii.

Toujeo waa insuliinta aan hore dhiigga u galin taasi oo si gaabis ah looga sii daayo barta qofka lagaga duray laguna sii daayo dhiigga waxaana laga helaa joogtaynta hoos u dhiga sonkorta dhiigga

muddo ka badan 24 saac, taasi oo yaraysa halista u nuglaanta insuliinta.

Qiyaasta daawada aad qaadanayso waxay ku xiran tahay qaabka noloshaada, natiijooyinka tijaabooyinka sonkorta dhiigga iyo wixii ah isticmaal hore ee daawada insuliinta. Haddaad ooga wareegto Toujeo daawo kale oo insuliin ah, qiyaasta daawada aad qaadanayso ayaa u baahan karta dib u habayn.

Tixraaca: Laga soo baddashay Becker et.al. Diabetes Care 2015; 38 (4):637-643

Sawirkha waxa uu natusayaa in Toujeo leedahay Žhab daganaasho 24 saac kasta taasi oo soconayso in kabadan 24 saac.

Waxyeelooyinka ka iman kara

Waa maxay waxyeelooyinka igaga iman kara daawaynta insuliinta?

Iyadoo ku xiran sababo kala duwan, waxa dhici karta in insuliintu kugu badan tahay marka loo eego xaddiga sonkorta ee dhiiggaaga ku jirta. Wuxuu markaa kugu iman doonta sonkorta oo intii caadiga ahayd ka yaraata ($<3.5 \text{ mmol/l}$). Tan waxa loo yaqaan u nuglaanta insuliinta.

Astaamaha guud:

- Gariir
- Gaajo dareemid
- Dhidid
- Wadne garaac aan caadi ahayn
- Diirad saaridda oo liidata
- Khalkhal aragga ah
- Kacsanaan/daandaansi badni
- Tamar darri

Waxyaalaha keena u nuglaanta insuliintu waxay noqon karaan:

- Cuntada oo daahda
- Cunto aad u yar

- Insuliin iyo/ama kiniinka sonkorta dhiigga yareeyaa oo badan
- Jimicsi xagga jirka ah (oo ka badan ama ka dheer intii la rabay)
- Khamro

Siaad sare ugu qaaddo sonkorta dhiiggaaga meeshana uga saarto u nuglaanta waa inaad had iyo jeer wax cunto. Waxa sida ugu dhakhsaha badan u kordhiya sonkorta dhiiggu waa dextrose, koob juus oo saafi ah ama wax kale oo macaan. Sonkorta dhiigga 3.0-4.0 mmol/l oo leh astaamo cadcad waxa lagu daaweyaa dextrose, 1/2-1 kiniinka dextrose ah 10-kii kg ee culayska jirka ahba. Biyo cab si dhakhso loogu nuugo.

Haddii wakhti badan ka harsan yahay xilligii cuntada, waxaad u baahan kartaa cunto fudud oo dheeri ah. U nuglaantu dhakhso kuma dhamaato inaad cunto cunno aad u badan. Xeer muhiim ah markii aad qaadanayso daawaynta insuliinta waa inaad had iyo jeer dextrose sidato.

Iska hubi in insuliinta ku jirta qalinka hore loo sii buuxiyay ay saafi tahay (aysan midab lahayn, saafi aan lahayn wax adag oo muuqan kara). Haddii daawada sonkorta ay tahay mid daruur daruur ah waa in aad iska tuurtaa

Qalinka Toujeo oo hore loo sii buuxshay ood isticmaasho mid cusub. Had iyo jeer isticmaal irbad cusub markaad isku

durayso Toujeo. Haddii ay jirto insuliin soo harta **6 toddobaad** oo isticmaal ah kadib, waa in aad iska tuurtaa qalinka hore loo sii buuxshay. Fadlan xasusnaw taariiqda markaad bilawday isticmaalka mid cusub oo ah qalinka Toujeo ee hore loo sii buuxshay.

Hubi sonkorta dhiiggaaga marka aadan muddo waxba cunin

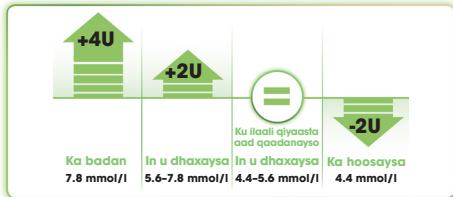

Waa muhiim in aad u leedahay aqoon fiican sonkorta dhiiggaaga marka aadan muddo waxba cunin. Heerarkan waxay ku siinayaan xogta aad u baahan tahay si aad u kordhiso/ yarayso qiyaasta aad qaadanayso ee Toujeo, adigoo la kaashanaaya dhaqtarkaada ama kalkaliyahaaga xanuunka sonkorta. Fadlan isticmaal buugga Xusuusqorka Sonkortaada si aad ula socoto heerarka sonkorta dhiiggaaga iyo qiyaasta aad qaadanayso ee insuliinta.

Sida loo qaato Toujeo

Qalimada Toujeo waa dameeri ifaya oo leh badhanka durista oo cagaar ah.

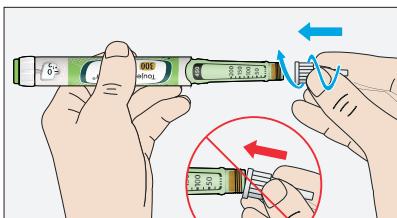

Toujeo SoloStar waxay leedadahay summad cagaar ah. Toujeo DoubleStar na wuxuu leeyayah summad boordoo ah.

2 Ka fur furka dhawrista oo xaqiji in insuliintu tahay mid saafi/xareedi ah.
